Optimum Upgrade – Product Catalog

Overview

Optimum Upgrade provides automation-enabled project management and systems engineering toolkits, built around Excel and Word, with a focus on defense, R&D;, and engineering teams.

1. Ultimate Automation Suite

The flagship bundle. Includes automation-enabled Excel toolkits, FalconEye sample project, automation installer, Automation Quick Start guides, and Developer SDK.

2. MIL-SPEC & DID Toolkit

Curated MIL-STD and DID references, index pages, and ready-to-tailor document templates for common data items.

3. FalconEye Micro-UAV Sample Project

A fully populated fictional micro-UAV program showing how WBS, requirements, risks, tests, and verification fit together.

4. PM/SE Starter Toolkit

Core Excel templates for WBS, risk register, RTM, test matrix, and verification summary, without the full automation stack.

5. Complete Bundle

All-in-one package combining the Automation Suite, MIL-SPEC Toolkit, FalconEye sample project, and PM/SE Starter Toolkit.

6. Developer SDK & Automation Add-on

For power users and internal toolsmiths who want to extend the VBA automation and integrate it into existing workbooks.
